# Contents of volume 329

No. 1 issued on March 28, 1985

**C. M. Tan, D. A. Powis:** Cardiac glycosides, calcium and the release of neurotransmitter from peripheral noradrenergic nerves **1**

**S. Barone, R. E. Stitzel, R. J. Head:** The stereoselective O-methylation of isoprenaline in the isolated rabbit thoracic aorta **9**

**H. Zemková, P. Svoboda, J. Teisinger, F. Vyskočil:** On the mechanism of catecholamine-induced hyperpolarization of skeletal muscle cells **18**

**C. F. Iriarte, R. Pascual, E. Morcillo, J. A. Bevan:** Responses of rabbit aorta to tyramine in relation to the surface of drug entry **24**

**S. Guimarães, M. Q. Paiva, D. Moura, J. Proença:** The saturability of a site of loss and the degree of supersensitivity to agonists which are substrates of this site of loss **30**

**K. H. Buchheit, G. Engel, E. Mutschler, B. Richardson:** Study of the contractile effect of 5-hydroxytryptamine (5-HT) in the isolated longitudinal muscle strip from guinea-pig ileum. Evidence for two distinct release mechanisms **36**

**P. Steinberg, C. G. Bonelli, M. C. Rubio:** Effect of triamterene on 5-hydroxytryptamine biosynthesis in different brain areas **42**

**F. Pagani, A. Brambilla, A. Schiavone, A. Giachetti:** Cholinergic control of gastric acid secretion **45**

**P. Holzer, I. Th. Lippe:** Substance P action on phosphoinositides in guinea-pig intestinal muscle: a possible transduction mechanism? **50**

**G. Jancsó, G. Such:** Evidence for a capsaicin-sensitive vasomotor mechanism in the ventral medullary chemosensitive area of the cat **56**

**J. P. Bussien, J. Nussberger, M. Porchet, B. Waeber, H. R. Brunner, M. Perisic, M. J. Tansey, M. Bomm, P. Hajdu:** The effect of the converting enzyme inhibitor HOE 498 on the renin angiotensin system of normal volunteers **63**

**D. Winne, H. Görig, U. Müller:** In vivo studies of mucosal-serosal transfer in rat jejunum **70**

**T. Ban, S. Sada, Y. Takahashi, H. Sada, T. Fujita:** Effects of para-substituted beta-adrenoceptor blocking agents and methyl-substituted phenoxypropanolamine derivatives on maximum upstroke velocity of action potential in guinea-pig papillary muscles **77**

**R. Brückner, W. Schmitz, H. Scholz:** Effects on transmembrane action potential, slow inward current and force of contraction in ventricular cardiac muscle of BRL 31 660, a new antiarrhythmic drug with class I and class IV activity **86**

*Short communications*

**W. Knepel, M. Schwaninger:** Release of dynorphin-like immunoreactivity from rat anterior pituitary gland in vitro **94**

**P. Erne, A. Pletscher:** Vasopressin-induced activation of human blood platelets: prominent role of $Mg^{2+}$ **97**

No. 2 issued on April 30, 1985

**J. Arnt, A. V. Christensen, J. Hyttel:** Pharmacology in vivo of the phenylindan derivative, Lu 19-005, a new potent inhibitor of dopamine, noradrenaline and 5-hydroxytryptamine uptake in rat brain **101**

**M. Vasse, P. Protais, J. Costentin, J.-C. Schwartz:** Unexpected potentiation by discriminant benzamide derivatives of stereotyped behaviours elicited by dopamine agonists in mice **108**

**C. Gulat-Marnay, A. Lafitte, J.-C. Schwartz, P. Protais:** Effects of discriminant and non-discriminant dopamine antagonists on in vivo accumulation of $^3$H-N-propyl-norapomorphine in mouse striatum and tuberculum olfactorium **117**

**R. Niddam, S. Arbilla, B. Scatton, T. Dennis, S. Z. Langer:** Amphetamine induced release of endogenous dopamine in vitro is not reduced following pretreatment with reserpine **123**

**C. Spyraki, Z. Papadopoulou, A. Kourkoubas, D. Varonos:** Chlorimipramine, electroconvulsive shock and combination thereof: Differential effects of chronic treatment on apomorphine-induced behaviours and on striatal and mesocortical dopamine turnover **128**

**S.-O. Ögren, O.-G. Berge:** Evidence for selective serotonergic receptor involvement in p-chloro-amphetamine-induced antinociception **135**

**A. K. Saxena, A. K. Saksena, M. S. Agnihotri, S. Vrat, K. K. Tangri, K. P. Bhargava:** Cardiovascular responses elicited by microinjection of monoamines into mesencephalic nucleus dorsalis raphe in cats **141**

**A. G. Dupont, R. A. Lefebvre, M. G. Bogaert:** Inhibitory effects of apomorphine and pergolide on neurogenic vasoconstriction in the hindquarters of the rat **146**

**V. B. Fiedler, T. S. Abram:** Molsidomine on cardiovascular leukotriene $D_4$ actions **152**

**R. M. Cohen, C. Aulakh, C. McLellan, D. L. Murphy:** 6-Hydroxydopamine pretreatment effects on $\alpha$- and $\beta$-adrenergic receptor adaptation to clorgyline **158**

**R. G. Chess-Williams, P. F. Grassby, W. Culling, W. Penny, K. J. Broadley, D. J. Sheridan:** Cardiac postjunctional supersensitivity to $\beta$-agonists after chronic chemical sympathectomy with 6-hydroxydopamine **162**

**T. Ishii, Y. Shimo:** Cooling-induced supersensitivity to acetylcholine in the isolated airway smooth muscle of the rat **167**

**J. Nedoma, N. A. Dorofeeva, S. Tuček, S. A. Shelkovnikov, A. F. Danilov:** Interaction of the neuromuscular blocking drugs alcuronium, decamethonium, gallamine, pancuronium, ritebronium, tercuronium and d-tubocurarine with muscarinic acetylcholine receptors in the heart and ileum **176**

**L. Bertrix, J. Lang, M. Lakhal, Q. T. Chah, G. Faucon:** Biphasic effect of a gradual rise in plasma calcium concentration on vulnerability to fibrillation **182**

**Y. Hattori, M. Kanno:** Effect of $Ni^{2+}$ on the multiphasic positive inotropic responses to histamine mediated by $H_1$-receptors in left atria of guinea pigs **188**

**P. Wollenberg, W. Rummel:** Influence of phosphate, sulfonic, and sulfamic acids on sulfoconjugate release in the vascularly perfused mouse small intestine **195**

**H. Th. Heidemann, J. F. Gerkens, E. K. Jackson, R. A. Branch:** Attenuation of cisplatinum-induced nephrotoxicity in the rat by high salt diet, furosemide and acetazolamide **201**

*Short communication*

**K. Starke, E. Schöffel, P. Illes:** The sympathetic axons innervating the sinus node of the rabbit possess presynaptic opioid $\kappa$- but not $\mu$- or $\delta$-receptors **206**

**No. 3** issued on May 20, 1985

**T. Glaser, J. Traber:** Binding of the putative anxiolytic TVX Q 7821 to hippocampal 5-hydroxytryptamine (5-$HT_1$) recognition sites **211**

**T. J. Feuerstein, G. Hertting, R. Jackisch:** Endogenous noradrenaline as modulator of hippocampal serotonin (5-HT)-release. Dual effects of yohimbine, rauwolscine and corynanthine as $\alpha$-adrenoceptor antagonists and 5-HT-receptor agonists **216**

**H. Takahashi:** Cardiovascular and sympathetic responses to intracarotid and intravenous injections of serotonin in rats **222**

**H. Schoemaker, C. Pimoule, S. Arbilla, B. Scatton, F. Javoy-Agid, S. Z. Langer:** Sodium dependent [$^3$H]cocaine binding associated with dopamine uptake sites in the rat striatum and human putamen decrease after dopaminergic denervation and in Parkinsons disease **227**

**P. Sokoloff, K. Redouane, M. Brann, M.-P. Martres, J.-C. Schwartz:** $^3$H-(−)DO 710 discriminates guanine nucleotide sensitive and insensitive dopamine binding sites **236**

**R. R. Ruffolo, Jr., K. Messick, J. S. Horng:** Interactions of the enantiomers of 3-O-methyldobutamine with $\alpha$- and $\beta$-adrenoceptors in vitro **244**

**P. Soares-da-Silva, R. Davidson:** Effects of 6-hydroxydopamine on dopamine and noradrenaline content in dog blood vessels and heart. Evidence for a noradrenaline-independent dopamine pool **253**

**N.-E. Andén, M. Grabowska-Andén, S. Lindgren, M. Oweling:** Very rapid turnover of dopamine in noradrenaline cell body regions **258**

**M. Grohmann, U. Trendelenburg:** The handling of five catecholamines by the extraneuronal O-methylating system of the rat heart **264**

**M. Marcoli, S. Lecchini, F. De Ponti, L. D'Angelo, A. Crema, G. M. Frigo:** Subsensitivity of enteric cholinergic neurones to $\alpha_2$-adrenoceptor agonists after chronic sympathetic denervation **271**

**N. Lattimer, K. F. Rhodes:** A difference in the affinity of some selective $\alpha_2$-adrenoceptor antagonists when compared on isolated vasa deferentia of rat and rabbit **278**

**J.-J. Descombes, J.-C. Stoclet:** Characterization of two distinct alpha-adrenoceptor binding sites in smooth muscle cell membranes from rat and bovine aorta **282**

**M. D. Kaniucki, J. C. Elverdin, F. J. E. Stefano, C. J. Perec:** Effects of guanabenz and guanfacine on postsynaptic $\alpha_2$-adrenoceptors in the rat submaxillary and parotid glands **289**

**J. W. van der Laan:** Effects of $\alpha_2$-agonists on morphine withdrawal behaviour: potentiation of jumping mediated by $\alpha_2$-receptors **293**

**S. Zielmann, G. Schütte, S. Lenzen, U. Panten:** Effects of isoprenaline and glucagon on insulin secretion from pancreatic islets **299**

**P. C. Waldmeier:** On the reversibility of reversible MAO inhibitors **305**

**R. P. Garay, J. Diez, C. Nazaret, G. Dagher, J. P. Abitbol:** The interaction of canrenone with the $Na^+$,$K^+$ pump in human red blood cells **311**

**G. Scholtysik, R. Salzmann, R. Berthold, J. W. Herzig, U. Quast, R. Markstein:** DPI 201-106, a novel cardioactive agent. Combination of cAMP-independent positive inotropic, negative chronotropic, action potential prolonging and coronary dilatory properties **316**

**K. H. Dangman:** Effects of bepridil on transmembrane action potentials recorded from isolated canine cardiac tissues. Studies on normal and infarct-zone Purkinje fibres and ventricular muscle cells **326**

**No. 4** issued on June 18, 1985

**H. B. Niznik, D. E. Grigoriadis, I. Pri-Bar, O. Buchman, P. Seeman:** Dopamine $D_2$ receptors selectively labeled by a benzamide neuroleptic: [$^3$H]-YM-09151-2 **333**

**D. Clark, G. Engberg, E. Pileblad, T. H. Svensson, A. Carlsson, A. S. Freeman, B. S. Bunney:** An electrophysiological analysis of the actions of the 3-PPP enantiomers on the nigrostriatal dopamine system **344**

**J. M. Goldstein, L. C. Knobloch-Litwin, J. B. Malick:** Behavioral evidence for $\beta$-adrenoceptor subsensitivity after subacute antidepressant/$\alpha_2$-adrenoceptor antagonist treatment **355**

**M. H. Richards:** Efflux of $^3$H-5-hydroxytryptamine from rat hypothalamic slices by continuous electrical stimulation: Frequency-dependent responses to serotonergic antagonists and 5-hydroxytryptamine **359**

**W. S. Schwark, W. Löscher**: Comparison of the anticonvulsant effects of two novel GABA uptake inhibitors and diazepam in amygdaloid kindled rats **367**

**M. J. Oset Gasque, S. Cañadas Correas, J. M. Massó Córdoba, M. P. González González**: Uptake of GABA by bovine adrenal medulla slices **372**

**S. Lindberg, U. Mercke**: Substance P antagonists and mucociliary activity in rabbit **376**

**J. R. Keast, J. B. Furness, M. Costa**: Different substance P receptors are found on mucosal epithelial cells and submucous neurons of the guinea-pig small intestine **382**

**H. Juan, W. Sametz**: Eicosapentaenoic acid inhibits the release of $^{14}$C-prostacyclin from a perfused tissue after incorporation of $^{14}$C-prostaglandin precursors **388**

**A. Pettersson, K. Gradin, T. Hedner, B. Persson**: Antihypertensive mechanism of action of ketanserin and some ketanserin analogues in the spontaneously hypertensive rat **394**

**B. S. Jandhyala**: Studies on the effects of felodipine on the vascular resistance and reactivity in pentobarbital anesthetized dogs **398**

**P. B. M. W. M. Timmermans, M. J. M. C. Thoolen, M. J. Mathy, B. Wilffert, A. de Jonge, P. A. van Zwieten**: Effects of the irreversible $\alpha$-adrenoceptor antagonists phenoxybenzamine and benextramine on the effectiveness of nifedipine in inhibiting $\alpha_1$- and $\alpha_2$-adrenoceptor mediated vasoconstriction in pithed rats **404**

**W. Schönfeld, J. Weiland, C. Lindig, M. Masnyk, M. M. Kabat, A. Kurek, J. Wicha, K. R. H. Repke**: The lead structure in cardiac glycosides is 5$\beta$,14$\beta$-androstane-3$\beta$,14-diol **414**

**G. Gross, I. Lues**: Thyroid-dependent alterations of myocardial adrenoceptors and adrenoceptor-mediated responses in the rat **427**

**H. Korb, A. Hoeft, D. H. Hunneman, R. Schraeder, H. G. Wolpers, G. Hellige**: Effectiveness of nicorandil in the preservation of myocardium stressed by transient ischemia and its influence on cardiac metabolism during coronary artery occlusion with subsequent reperfusion: a comparison with isosorbide dinitrate **440**

*Short communications*

**M. Böhm, H. Burmann, W. Meyer, M. Nose, W. Schmitz, H. Scholz**: Positive inotropic effect of Bay K 8644: cAMP-independence and lack of inhibitory effect of adenosine **447**

**J. Weber, J. Krieglstein**: Effect of gallopamil on energy metabolism of the isolated perfused rat brain in the postischemic period **451**
